Work Experience

Downunder Landscape - Freelance Web Developer

July 2020 - Current

Working with client to re-design and rebuild company website to improve customer experience and increase conversion.

- Performed UX research to understand site visitor needs by interviewing previous Downunder Landscape customers.
- Designed, tested, and iterated on site wireframes in Figma based on client and customer feedback.
- Utilizing React.js and Styled Components to develop and publish new responsive company website from Figma wireframes.

Pacific Magazines - Junior Software Engineer

June 2019 - December 2019

Wrote production level frontend code for several digital products, including Marie Claire, Men's Health, and Better Homes and Gardens.

- Worked with product team to implement and test frontend design changes from Figma wireframes, within budgeted timeline.
- Built frontend components to match design spec using vanilla JS, LESS, and HTML.
- Implemented and updated page structured data to comply with best SEO practices.
- Maintained ad loading script polyfills for Internet Explorer.
- Performed detailed page weight audits to ensure page load speed goals were achieved.
- Adhered to best practice version control techniques with Git.
- Performed pull request reviews for other team members.
- Assisted in sprint planning and organizing.

Bachelors of Design Computing

University of Sydney, New South Wales

March 2017 - July 2020

Extras

UX Research/UI Design

Learned and applied best User Experience research and design principles as part of my university course. Created and iterated on several web and mobile app interfaces throughout the duration of my degree.

Sydney University Experience Design Club

Co-founded and acted as the Projects Executive of the Sydney University Experience Design Club (SUEDE). Organized and managed extracurricular design and development contests for students.

Student Innovation Challenge Award Recipient

Received this award and a \$5000 grant from the University of Sydney for co-creating *The Jist*, a mobile app designed to help students take notes in lectures more effectively.
