Work Experience

Designed, developed, and deployed full stack web applications as a sole developer for several small business clients.

Freelance Full Stack Web Developer

Shirk Law (June 2021 - Current)

- Worked with client to translate business needs into software deliverables, balancing client resources and engineering constraints.
- Developed, deployed, and maintained performant full stack web tools using React, Node, MongoDB, and AWS Lambda.
- Managed version control and CI/CD for production and testing environments.
- Designed and implemented a domain DMARC lookup tool, improving the security-focused reputation of the clients firm.
- Created JSON data model and web UI to store, display, and dynamically update state loan options and related information.
- Implemented user authentication system using modern web security practices.

Big Wave Water (June 2020 - July 2021)

- Designed wireframes in Figma for website redesign. Used iterative client feedback on wireframes to create a specification that would meet business needs.
- Implemented and deployed new client website on Netlify using React, Styled Components, and React Router.
- Designed custom product animations in Adobe Illustrator/After Effects. Displayed animations performantly on client website using React Lottie.
- Designed and implemented an interactive state representative coverage map using SVG in React. Improved client efficiency by decreasing customer questions related to state representative coverage areas.

Assorted Clients (February 2020 - March 2022)

- Worked with small business clients to redesign and rebuild static business websites using React, React Router, and Styled Components. Iteratively designed, tested, and improved site wireframes with clients using Figma.
- Improved client conversion by creating prominent contact forms and autofill phone and email contact links.

Junior Software Engineer

Pacific Magazines (June - December 2019)

- Updated frontend components in production using vanilla JS, LESS, and HTML from Figma design specification. Met strict release deadlines in an Agile environment.
- Performed pull request reviews for other team members. Assisted in sprint planning and organizing.
- Implemented and updated page structured data to comply with best SEO practices.
- Re-wrote and maintained ad loading JS polyfill script for Internet Explorer.

Tools and Software

- Git/Github
- Javascript(ES6)/HTML/CSS
- React.js/React Router/Styled Components
- Node.js/Express.js
- Netlify/AWS Lambda/Serverless
- MongoDB/NoSQL
- JSON/RESTful APIs
- Figma/Adobe XD
- Adobe Illustrator/After Effects

Education

Bachelors of Design Computing

University of Sydney, NSW, Australia

March 2017 - February 2020
