Work Experience

Pacific Magazines - Software Engineer Intern

June 2019 - November 2019

Wrote production level frontend and backend code for several digital products, including Marie Claire, Men's Health, and Better Homes and Gardens. Performed a wide range of activities, including:

- Primarily worked with product team to implement and test frontend design changes from Figma wireframes and within budgeted timeline.
- Built frontend components to match design spec using JS, LESS, and HTML.
- Performed detailed page weight audits to ensure page load speed goals were met.
- Implemented and updated page structured data to comply with best SEO practices.
- Maintained ad loading script polyfills for Internet Explorer.
- Adhered to best practice version control techniques with git.
- Created backend CMS features to change content authoring.
- Performed backend database migrations.
- Performed pull request reviews for other team members.
- Assisted in sprint planning and organizing.
- Effectively communicated progress at daily team standups.
