Work Experience

Freelance Full Stack Web Developer

Shirk Law *(June 2021 - Current)*

- Worked with client to translate business needs into software deliverables, balancing client resources and engineering constraints.
- Developed, deployed, and maintained performant full stack web tools using **React**, **Node**, **MongoDB**, and **AWS Lambda**. Created a DNS DMARC lookup tool that improved the security-focused reputation of the firm and brought in new clients.
- Created **JSON** data model and web UI to store, display, and dynamically update state loan options and related information.
- Improved the firms data security by implementing a user authentication system using **Node** and **JSON Web Tokens**.

Hostworks Promo *(April 2022 - July 2022)*

- Worked with small business client to a build a static promotional website using **React** and **Styled Components**. Improved new client conversion rate by 16% after site was deployed.

Big Wave Water *(June 2020 - July 2021)*

- Iteratively designed a new client website using **Figma** to meet business needs. Implemented and deployed new client website on **Netlify** using **React**, **Styled Components**, and **React Router**.
- Created and implemented custom product animations using **Adobe Illustrator/After Effects** and **React Lottie**, improving the brand image and presentation of the business.
- Designed and implemented an interactive state representative coverage map using SVG in **React**. Improved client efficiency by decreasing phone calls related to state representative coverage areas.

Downunder Landscape (February 2020 - July 2020*)*

- Worked with small business client to create a static business website using **React** and **SCSS**. Created automated email system for potential customers to leave a message via a contact form, generating several new leads.

Junior Software Engineer

Pacific Magazines *(June 2019 - December 2019)*

- Updated frontend components in production using **Javascript**, **LESS**, and **HTML** from **Figma** design specification. Met strict release deadlines in an Agile environment while assisting in sprint planning and performing code reviews for other team members.
- Implemented and updated page structured data to comply with best SEO practices and to meet web accessibility standards.
- Re-wrote and maintained ad loading **Javascript** polyfill script for Internet Explorer, allowing the business to retain ad revenue from several thousand users.
