Work Experience

Pacific Magazines - Junior Software Engineer

June 2019 - Nov 2019

Pushed production level frontend and backend code to several digital products, including Marie Claire, Men's Health, and Better Homes and Gardens. Performed a wide range of activities, including:

- Worked with product team to implement and test frontend design changes from Figma wireframes and within budgeted timeline.
- Demonstrated proficiency across JS, LESS, and HTML/CSHTML.
- Performed detailed page weight audits to ensure fast load times.
- Implemented and updated page structured data to comply with best SEO practices.
- Maintained ad loading script polyfills for Internet Explorer.
- Created backend CMS features to change content authoring.
- Performed backend database migrations.
- Performed pull request reviews for other team members.
- Assisted in sprint planning and organizing.
- Effectively communicated progress at daily team standups.
